ABOUT ME

I'm a JavaScript developer with experience building landing pages and single page apps using **React (JS/TS), Redux**, and maintaining and developing rich projects (**MEVN**).

Now I am improving my skills in these areas and expanding them with new technologies, and in my free time I devote to solving the CodeWars kata and improving my English.

At the moment, I would like to find a project/full-time job in a creative company with an urgent task and a close-knit team!

WORK EXPERIENCE

CJSC ADVIN SMART FACTORY, 2022 – present time
